# High-Impact Practices for Prospective Scholarship Applicants

## Define Your Goals

**Define your goals and interests early, and regularly reevaluate them as your trajectory evolves.**

Selection committees appreciate individuals who are self-reflective.

## Embrace Complexity

**Seek out opportunities to engage in conversation on complex topics, especially staying informed of current events.**

Selection committees want to see that you can grapple with nuanced, complicated issues without obvious or simple solutions.

## Challenge Yourself

**Enroll in challenging courses that expand your academic trajectory and perspective.**

Selection committees want to see that you are challenging yourself, both in breadth and depth.

## Specialize

**When you encounter topics or issues that excite you, follow that lead.**

Selection committees will be impressed with the level of expertise you have developed through deep study and engagement.

## Build Relationships

**Build relationships with faculty members outside the classroom and maintain them over time.**

Not only do faculty make great mentors, but selection committees often look to letters of rec as confirmation of your talents.

## Conduct Research

**Conduct faculty-mentored research.**

The transition from being a consumer of knowledge to a producer of knowledge is an important indicator of maturity for selection committees.

## Make an Impact

**Make an impact on an organization or club, pursuing opportunities for leadership and change-making.**

Selection committees are using this information to envision how you will continue to be a leader in the future.

## Celebrate Differences

**Embrace opportunities to learn about people who are different from you.**

Selection committees want to know that you will be able to work with and benefit communities different from your own.

## Give Back

**Show the selection committee that you are interested in making a positive contribution to society.**

Scholarship foundations are not only investing in you, but also in all the good you will do in the future.
